

## **PROJECTBETA GAMING**

### **Introduction:**

We all know what gaming is and how to play games since childhood. Gaming has always been interesting and sometimes competitive. So we here at Sanskriti are going to keep a cross platform gaming competition online and hope everyone enjoys it.

### **Games we play:**

- Rocket League
- Fortnite
- Minecraft
- Brawlhalla
- FIFA 22 (optional)
- Valorant

### **How we conduct the tournament:**

Usually we conduct it depending on the number of players i.e Round of 16, Quarter-Finals, Semi-Finals and Finals. We have a knockout tournament system to conduct the tournament. This time too the tournament will depend on the number of players participating.

### **Competitions:**

Talking about competitions, most of the gaming tournaments are held in july-august and october-november every year. Each tournament has different games which every participant plays. Interested members give their name to the HODs of gaming (PC or console) and they choose and make the team. Those who perform well and win competitions have a greater chance of becoming the HODs of gaming for the upcoming year.

**Remember: Failure doesn't mean the game is over, it means try again with experience.**
