## Types of Edits

- Montages

Montage is a film editing technique in which a series of short shots are sequenced to condense space, time, and information. The term has been used in various contexts. The clips are to be synchronized with the beats of the music to make the montage more interesting and professional.

Common softwares used to make montages are : **Sony Vegas Pro,**  
**Adobe Premiere Pro**

- Trailers/ Advertisement

A trailer (also known as a preview or coming attraction video) is a commercial advertisement, originally for a

feature film that is going to be exhibited in the future at a movie theater/cinema. It is a product of creative and technical work. Cinematic trailers are the idealized versions of a game, where every move is flawless, every camera angle is perfect, every shot is beautiful, and every bullet is extra-bullet.

Common softwares used to make montages are : **Sony Vegas Pro, Adobe Premiere Pro**

- **Motion Design**

Most Motion Graphics Designers have an interest or background in art, and/or graphic design. In fact, most Motion Graphic Designers typically have a strong sketch and/or creative/graphic design skill sets, and while pursuing or exploring those opportunities, learn about and add Motion Graphics Design to their list of skills and abilities.

These designers must be skilled at hearing about an idea or concept and then creating a sketch to flesh out that idea or concept. They can often create several versions of a sketch or animation, and edit it frequently before completing the final version. Motion Graphic Designers should be skilled at using constructive feedback to make adjustments as needed by the company or client.

Motion design includes animations, typography, lyrical videos and any other form which can take a lot of manual work.

Common softwares used for motion design are : **After Effects**
